

DIALECTIC CLASH OF CULTURES

The world controllers have long planned in using Capitalism and Communism, two dominate Political-Economic systems intentionally in opposition creating a dialectic eventually to result in something new and different to be *merged* together establishing Communitarianism which is called “The Third Way” - Communitarianism is a deception, an end run to condition and transform the world community into World Communism.

COMMUNITARIANISM

Communitarianism's basic concept is the that “The Community” should have priority over the individual or said another way “The State” should have power over the individual.
