Cracking the Code of Electronic Voting Corruption In Texas

Laura Pressley, Ph.D.
512-762-3825

Email: LauraPressley@StartMail.com
Website: www.PressleyForAustin.com

Dr. Laura Pressley is a former candidate for the Austin City Council and has cracked the code of electronic voting corruption in Texas and has filed an historic election contest with evidence of how county election corruption occurs. Dr. Pressley's recent legal case, currently in the Texas Supreme Court, uncloaks the truth about electronic voting in Texas.

She has given over 150 non-partisan presentations across the state on the technical details of how Texas' electronic voting machines are not adhering to state laws, how electronic voting corruption is occurring all over Texas, how it occurs, and what is being done about it. With all the election integrity issues being reported across the state, Texans have had enough. We are ready to take back our power at the voting booth and Dr. Pressley discusses how we can ensure honest elections happen in Texas.

Dr. Pressley is a native Texan and earned her Ph.D. in Physical Chemistry from UT Austin and was an engineer and gross margin business manager in the semiconductor industry in Austin for 17 years. She holds 4 US patents on semiconductor device technology and is the co-author of numerous peer reviewed scientific articles.

Dr. Pressley has appeared on the CBS Early Show, Good Morning Austin, Roger Stone's Stone Cold Truth Radio Show, and many others. She has testified as a citizen's advocate to the Texas Senate and House on election and technology issues and has served on the Executive Committees of several boards in Austin.
